

# Multiplex Company Profile

Engineering, automation and technology solutions.

MULTIPLEX SYSTEMS LIMITED

## Multiplex Company Profile

Engineering, automation and technology products and services for Tanzania and African markets.

### Engineering | Automation | Technology

This Multiplex-branded brochure has been rebuilt for web download, proposals and customer discussions. It reflects fuel automation, IoT, engineering and technology capabilities for practical African operations.

# Company Overview

Multiplex Systems Limited is a Tanzania-based engineering, automation and technology company serving practical infrastructure and industrial markets.

- Electrical works and power systems
- Mechanical engineering
- Automation and control systems
- Oil and gas engineering
- Civil and building works
- ICT, telecom, IoT and data analytics

## Why Multiplex

The company combines product supply, installation, assessment, supervision and after-sales support with strong supplier relationships.

- High-quality products from reputable manufacturers
- Local Tanzanian delivery and project knowledge
- Supply chain planning and product availability
- Technical support and field service capability
- Broad service coverage across engineering and technology
- Customer-focused implementation and support

## Fuel Technology Focus

Multiplex can extend its engineering and technology profile into smart fuel stations, terminal logistics, fleet fueling, payments and analytics.

- Fuel station automation and wet stock visibility
- Fleet fuel controls and payment workflows
- Convenience store POS and customer loyalty
- Terminal and downstream logistics management
- Aviation fueling visibility and metering
- Operational dashboards and IoT connectivity
